Moving Sprites in Scratch

How do Sprites move in Scratch? Open the file *moving.sb2* and answer the questions below. (No Redo possible.)

1. Click the green flag. What do the four animals do?

2. Look at the scripts for each of the 4 Sprites. What 3 blocks do all three Sprites have in common?

3. What blocks does the Cat use to move from left to right?

4. What block does the Dog use to move from left to right?

5. What block does the Monkey use to move left to right?

6. What blocks does Weirdo use to move from left to right?

7. What is the difference between the *go to x:y* block  and the *glide secs to x:y* block?

8. The *if on edge, bounce* block  should only be used with which other block?
