

Special Characters in HTML

Special characters are symbols that can be displayed on the webpage, but which you can't type with your English language keyboard in Notepad or Notepad++.

All special characters start with an ampersand (&) and end with a semi-colon (;).

Special characters can be used with a name or a number. It is easier to read the code if the name is used. Here is a list of the most commonly used special characters:

Description	Special Character Name	Special Character Number
Ampersand	&	&
Angle Bracket – left	<	<
Angle Bracket – right	>	>
