Web Programming
Web #10 – Finish the Website

Objective: Complete the website you started with *Web #9*.

Note: You must finish Web #9 before starting this assignment!

In your *Web* folder, create a folder named *first_last_web_10*. Copy all of the files and images from *first_last_web_9* and paste them in *first_last_web_10*.

1. The "*About Me*" page needs 2 images.

    a. Find 2 images that show something you like. They can be pictures of items from your list of favorite things, or they can be personal pictures of you. These images need to be in the *first_last_web_10* folder.

    b. Add the 2 images this page. Make sure they have frames using the same classes (frame, floatleft, floatright) that you used on the "*My Future*" page. Make sure you have courtesy of paragraphs. One image should be floated left, the other floated right.

2. On the "*My Favorite Things*" page, highlight your favorite thing in each list using an <em> tag. You will need to style #*content em* in *web8.css*. See the example.

3. Nothing additional is needed for the "*My Useful Websites*" page.

4. The *"My Schedule"* page needs one paragraph about each of your periods. These paragraphs should be below the table. What are you learning that period? Do you like it? How are you doing in that period?

5. Nothing additional is needed for the *"My Future"* page.

6. Validate all 5 HTML files: *index.html, future.html. schedule.html, useweb.html* and *favorites.html*. (You will use the HTML validator **ONLY**, not the CSS validator.)

7. Validate the *web8.css* file. (You will use the CSS validator **ONLY**, not the HTML validator.)

8. Make sure that you turn in the complete website.

9. Compress your *first_last_web_10* folder and turn it in in the usual manner.

😊 **Ms. Blomeyer**

About Me | **My Favorite Things** | **My Useful Websites** | **My Schedule** | **My Future**

I was born in Pasadena, California on July 14. I think it's funny, because July 14 is a national holiday in France. It's the day that the peasants stormed the Bastille. However, *Bastille Day* was back in 1789, and although you probably think I'm old, I'm not that old!

I graduated from USC with a Bachelor's degree in 1974. I had a double major of *Math and German*. As part of my German major, I was given a scholarhip to attend the *University of Vienna* in Austria during my senior year. I finished my Master's degree 2 years later in Math. I taught school for 5 years and then I started programming computers. I programmed computers for 25 years before I came back to teaching.

I am blessed to have 2 wonderful daughters, 3 adorable granddaughters, and 1 precious grandson. My older daughter is **Jenzi** and her sister is **Kiri**. Jenzi has 2 daughters. **Jordan** was born in 2007 and her younger sister **Avery** was born in 2010. Kiri has a daughter, **Zara**, who was born in 2016 and a son Owen who was born in 2020. They are all an absolute joy. I spend a lot of with them.

In my free time I used to do a lot cross stitch. I have stitched many pictures. I also have enough cross stitch ornaments to completely fill up a Christmas tree. Unfortunately, the arthritis in my hands makes it to difficult to sew anymore. I also love to read. My favorite authors are Harlan Coben, Jim Butcher, and Michael Connelly. I also am hooked on television, I'm sorry to say!

About Me | **My Favorite Things** | **My Useful Websites** | **My Schedule** | **My Future**

These are a few of my favorite things.

➡ My favorite color is **purple**.
➡ My favorite ice cream flavor is **cake batter**.
➡ My favorite sports team is the **Angel City Football Club (ACFC)**.
➡ My favorite cookie is **white chocolate macademia nut**.
➡ My favorite subject in school is **math**.
➡ My favorite kind of music is **classic rock**.
➡ My favorite singer is **Keith Urban**.
➡ My favorite song is **Shut Up and Dance by Walk the Moon**.
➡ My favorite dog breed is a **dachshund**.
➡ My favorite actor is **Denzel Washington**.
➡ My favorite actress is **Jennifer Lawrence**.
➡ My favorite food is **cheese enchiladas**.
➡ My favorite politician is **Stacey Abrams**.
➡ My favorite movie is **Star Trek IV: The Voyage Home**.
➡ My favorite TV show is **NCIS**.

| About Me | My Favorite Things | **My Useful Websites** | My Schedule | My Future |

This is a list of the websites I use most often.

➡ **Amazon** is where I do most of my shopping. I am an Amazon junky!
➡ **Google** is where I do all of my searching.
➡ **Google Maps** is where I figure out how to get places.
➡ **Gmail** is where I read my personal email.
➡ **LAUSD Mail** is where I read my LAUSD email.
➡ **Schoology** is where I post assignments and grades for my students.
➡ **Facebook** is where I keep track of friends and family.
➡ **Internet Movie Database** is where I find information about movies and TV shows.
➡ **CNN10** is where I find daily news to play during homeroom.
➡ **WPMS STEM** is where I find information about Walnut Park Middle School STEM Academy.

Period	Subject	Room	Teacher
H	Homeroom	D217	Ms. E. Blomeyer
1	Intro to Programming	D217	Ms. E. Blomeyer
2	Conference/Planning	D217	Ms. E. Blomeyer
3	Intro to Programming	D217	Ms. E. Blomeyer
4	Intro to Programming	D217	Ms. E. Blomeyer
5	Intro to Programming	D217	Ms. E. Blomeyer
6	Intro to Programming	D217	Ms. E. Blomeyer
7	Web Design	D217	Ms. E. Blomeyer

During 1st, 3rd, 4th, 5th, and 6th periods, I teach **Intro to Programming**. Students in this course show their logical thinking skills by doing Mind Benders. Students learn about binary numbers and ASCII codes. They learn programming principles by coding in Scratch. This course also includes typing and searching practice.

During 7th period I teach **Web Design**. In this course, students learn how to build web pages using the HTML and CSS that are the building blocks for the web. They demonstrate their logical thinking skills by completing number puzzles such as Sudoku, Kakuro, and Kenken.

Image courtesy of USC
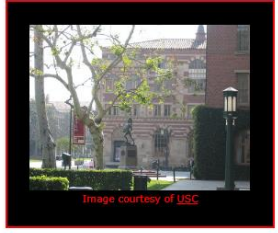

I can't really talk about my future college because I went to college in the past. However, I did go to USC which is located very near downtown Los Angeles. I earned a Bachelor's degree with a double major in Math and German followed by a Master's degree in Math. I chose USC because they have an honor's program for high school seniors. So I didn't attend my senior year in high school but went straight to USC instead. I was in a program called the *Resident Honor's Program for High School Seniors* or **RHP** for short.

Another reason I chose USC is because both my parents went there. My mother earned her Bachelor's degree there and my father earned 2 Master's degrees there. One of my favorite pictures from my childhood is a picture of my dad and me in front of Tommy Trojan on his graduation day.

Teaching is my current job and I love it! I am having a lot of fun with my **Intro to Programming** and **Web Design** students. Most of them are fully engaged and are really trying to learn the subject. In my past, I was a math teacher. I started teaching junior high math a long time ago.

Before I was a teacher, I worked in industry as a computer programmer. I know many different programming languages. When you work as a programmer, you do a lot of head-work and thinking. I enjoy that.
