

## Web Programming

### Web #9 – Continue the Website

Objective: Continue the website you started with *Web #8*.

**Note: You must finish Web #8 before starting this assignment!**

Overview: You will find the *index.html* file for each of the Web #1, #3, #5, #6, and #7 assignments. You will copy the HTML for these assignments **excluding** any h1 elements and the `<div id="content">`. You will paste the HTML inside the `<div id="content">` in the following files:

Assignment	File
Web #1	index.html
Web #3	favorites.html
Web #5	useweb.html
Web #6	schedule.html
Web #7	future.html

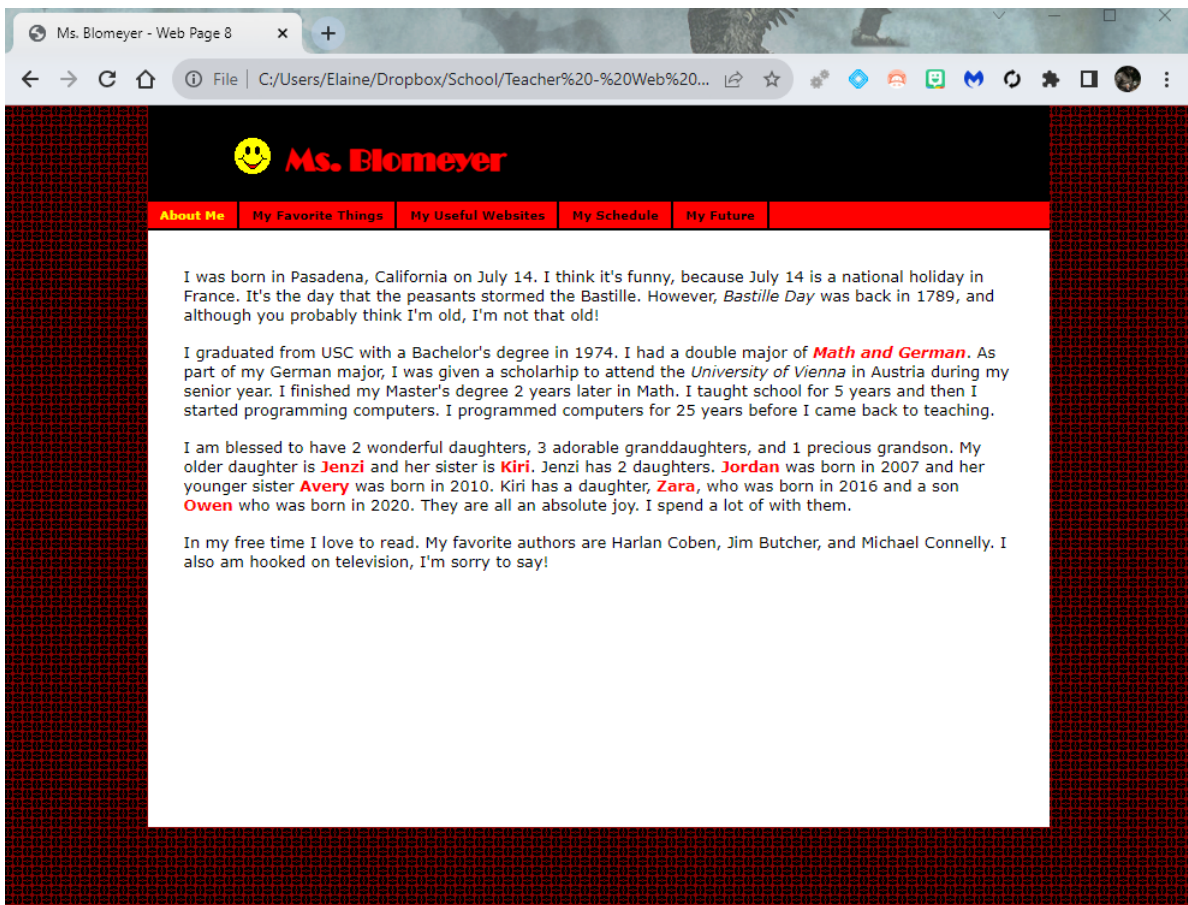

Now, you will look at the CSS in the *index.html* file for the original assignments, and find the CSS that is not already in *web8.css*. You will copy that CSS and paste it in the *web8.css* file. You will then change any colors to match your website scheme.

Note: There should be **no h1 elements** on these pages! There are samples of how each page should look at the bottom of this file. Make sure your pages look similar to the samples.

In your *Web Design* folder, create a folder named *first\_last\_web\_9*. Copy all of the files and images from *first\_last\_web\_8* and paste them in *first\_last\_web\_9*.

1. Gather all your images. Do not copy the background images! Only the images that are displayed on the web pages.
  - a. Find the images for your favorite college and your job in the *Web #7* assignment and paste the images in your *first\_last\_web\_9* folder.
  - b. Find the image you used as the “*pointer*” in your *Web #5* assignment and paste it in your *first\_last\_web\_9* folder.
2. The “*About Me*” page will consist of the paragraphs from your *Web #1* assignment. (No h1 element!)
3. The “*My Favorite Things*” page will consist of the list you created for *Web #3*. (No h1 element!)
  - a. Above the list is a paragraph *These are a few of my favorite things*.
  - b. The list uses the image you used in *Web #5*.
4. The “*My Useful Websites*” page will consist of the list you created for *Web #5*. (No h1 element!)
  - a. Above the list is a paragraph *This is a list of the websites I use most often*.
  - b. The list uses the image you used in *Web #5*.
  - c. Make sure your links work and hover. The links should be a different color from the text.
5. The “*My Schedule*” page will consist of the table you created for *Web #6*.
  - a. Remove the caption from the table.

- b. The table should be centered on the page. The header row of the table should be different from the other rows. The data rows should have alternating colored backgrounds.
  - c. The links to your teacher's website should be the same color as the rest of the data in the row. The links should work and hover.
6. The "My Future" page will consist of the paragraphs and images you used in Web #7.
  7. Be very careful with the CSS in the *web8.css* file. Do not have more than one declaration block with the same selector. Make sure all of your pages have the same look. Make sure that the colors on all the pages are consistent and complement your background image.
  8. Validate all 5 HTML files: *index.html*, *future.html*, *schedule.html*, *useweb.html* and *favorites.html*. (You will use the HTML validator **ONLY**, not the CSS validator.)
  9. Validate the *web8.css* file. (You will use the CSS validator **ONLY**, not the HTML validator.)
  10. Make sure that your turn in the complete website.
  11. Compress your *first\_last\_web\_9* folder and turn it in in the usual manner.

- About Me
- My Favorite Things**
- My Useful Websites
- My Schedule
- My Future

These are a few of my favorite things.

- ➔ My favorite color is purple.
- ➔ My favorite ice cream flavor is cake batter.
- ➔ My favorite sports team is the Angel City Football Club (ACFC).
- ➔ My favorite cookie is white chocolate macademia nut.
- ➔ My favorite subject in school is math.
- ➔ My favorite kind of music is classic rock.
- ➔ My favorite singer is Keith Urban.
- ➔ My favorite song is Shut Up and Dance by Walk the Moon.
- ➔ My favorite dog breed is a dachshund.
- ➔ My favorite actor is Denzel Washington.
- ➔ My favorite actress is Jennifer Lawrence.
- ➔ My favorite food is cheese enchiladas.
- ➔ My favorite politician is Stacey Abrams.
- ➔ My favorite movie is Star Trek IV: The Voyage Home.
- ➔ My favorite TV show is NCIS.

Image courtesy of USC

I can't really talk about my future college because I went to college in the past. However, I did go to USC which is located very near downtown Los Angeles. I earned a Bachelor's degree with a double major in Math and German followed by a Master's degree in Math. I chose USC because they have an honor's program for high school seniors. So I didn't attend my senior year in high school but went straight to USC instead. I was in a program called the *Resident Honor's Program for High School Seniors* or *RHP* for short.

Another reason I chose USC is because both my parents went there. My mother earned her Bachelor's degree there and my father earned 2 Master's degrees there. One of my favorite pictures from my childhood is a picture of my dad and me in front of Tommy Trojan on his graduation day.

Teaching is my current job and I love it! I am having a lot of fun with my **Intro to Programming** and **Web Design** students. Most of them are fully engaged and are really trying to learn the subject. In my past, I was a math teacher. I started teaching junior high math a long time ago.

Before I was a teacher, I worked in industry as a computer programmer. I know many different programming languages. When you work as a programmer, you do a lot of head-work and thinking. I enjoy that.
